

Cloud Core Ecology™

With Cx2, burgeoning cloud providers can leverage fortified colocation facilities and custom suites to acquire turnkey space without any minimum deployment requirements.

Cloud companies clamoring to gain access to one of the most data and customer-rich markets in the world can leverage DataGryd's 60 Hudson Street location in the same way that cloud companies provide their services on a pay-as-you-grow model.

Past commitment obligations and business hedging for data center and colocation space is no longer necessary as DataGryd's ready-for-service, customized colocation solutions offer the flexibility and growth trajectory companies require – without the physical and facility management commitment and burdens.

Cx2 delivers:

- Turnkey data center space – with minimal deployment requirements
- Ramp-up, flexible pricing – on a pay-as-you-grow basis
- No cross-connect fees for connectivity between Cloud Service Providers, their colocation customers, or to carriers
- Direct access to the world's richest interconnection building, including infrastructure, fiber vaults and conduits
- Through this densely connected building, the Cx2 offering provides direct access to all of the building's Meet-Me-Rooms-third-party charges will apply

Colocation in Manhattan doesn't have to be on your bucket list. Cx2 is now live and available in DataGryd's 60 Hudson. Street data center facilities.

Introducing DataGryd's Cloud Core Ecology™ Solution

Where growth is possible and global network accessibility attainable.

In Manhattan alone, there is vast number of cloud solution providers, networks and data centers. But only one of these data centers provides a full suite of flexible, pay-as-you-grow solutions combined with almost unlimited global network capacity specifically designed with cloud providers in mind.

Welcome to DataGryd.

DataGryd has designed its Cloud Core Ecology™(Cx2) solution specifically for cloud providers, ensuring seamless integration and affordable access to the most connected building on the East Coast. Centrally located and one of the most interconnected carrier hotels in the world, 60 Hudson Street, is where DataGryd's state-of-the-art data center resides. DataGryd has designed a Data Center-as-a-Service (DCaaS) product that delivers cloud providers a uniquely flexible and accessible solution rarely seen in such a dense market.

While DataGryd's strategically located data center offers cloud providers the critical space and power they require for deployment, it also provides unprecedented access to one of the world's largest enterprise markets for interconnectivity to enable cloud, Hybrid cloud, or private cloud computing, which in NYC, is largely untapped. With many of the City's enterprises enhancing and accelerating their cloud strategies, the potential and possibilities are endless.

About DataGryd

The DataGryd team has more than 100 years of combined experience; including owning and operating data centers, acquiring real estate for institutional investors, and overseeing telecommunications network construction and engineering projects. Each member of the team has held upper management roles at major companies within related industries and enjoys applying their knowledge at DataGryd.
