

Online Tech to Offer Direct Access to Console's Software and Interconnection Platform

Platform Provides Online Tech's Customers Fast and Direct Access to Cloud Providers

Ann Arbor, Mich. – September 9, 2015 – [Online Tech](#), a leading provider of hosting and cloud services, announced today that the company has joined the Console Data Center Partner Program to provide customers access to [Console](#), the enterprise software and interconnection platform that is changing the way businesses directly connect to their customers, vendors, and partners.

The Console Data Center Partner Program provides a turnkey solution for data center operators to offer customers direct access to Console for network-to-network and enterprise-to-enterprise collaboration globally. The partner program provides the necessary support to make a datacenter Console-enabled as well as marketing resources to highlight their business.

The Console software and interconnection platform provides a secure, simple, and faster way for companies across the globe to directly connect to business-critical cloud providers, SaaS providers, and partners. By combining direct access from within a Console-enabled datacenter with Console's network automation technology, customers gain access to a global ecosystem without the configuration complexity.

"We are excited to offer the Console platform in our data center as a means for our clients to directly connect to a massive ecosystem of business-critical resources," says Jason Yaeger, Senior Director of Solutions Architecture, Online Tech.

Online Tech currently has five locations throughout Michigan and Indiana offering cloud, colocation, offsite backup and disaster recovery services. From healthcare and financial services to retail, SaaS and other regulated fields, Online Tech's services cover a wide array of business verticals, while continuously improving its offered services with enhancements including one of the country's first all-flash cloud that meets key regulatory compliance.

The Console platform enables Online Tech's clients to bypass the public Internet for optimal performance and direct access to leading cloud infrastructure and SaaS providers.

“We are excited to welcome Online Tech to the growing number of cloud service providers who are joining Console. By working with companies like Online Tech, we continue to expand Console’s cloud service provider ecosystem and enable direct access to the business-critical resources that enterprises need,” says Al Burgio, CEO, Console.
