

Netelligent to Offer Direct Access to Console's Software and Interconnection Platform

Platform Provides Netelligent Customers with Access to a Rich and Diverse Global Network of Major Cloud and SaaS Providers through the Simple and Easy-to-use Console Platform

Montreal, Canada – September 9, 2015 – [Netelligent Hosting Services](#), Canadian leaders of high-density, zero downtime hosting solutions announced today that the company has joined the Console Data Center Partner Program to provide customers access to [Console](#), the enterprise software and interconnection platform that is changing the way businesses directly connect to their customers, vendors, and partners.

The Console Data Center Partner Program provides a turnkey solution for data center operators to offer customers direct access to Console for network-to-network and enterprise-to-enterprise collaboration globally. The partner program provides the necessary support to make a datacenter Console-enabled as well as marketing resources to highlight their business.

The Console software and interconnection platform provides a secure, simple, and faster way for companies across the globe to directly connect to business-critical cloud providers, SaaS providers, and partners. By combining direct access from within a Console-enabled datacenter with Console's network automation technology, customers gain access to a global ecosystem without the configuration complexity.

"We are very pleased to be the first to offer this platform in Montreal," says Billy Krassakopoulos, co-founder and COO of Netelligent Hosting Services. "Clients in our newly built Stock Exchange Tower datacenter will be able to bypass the public Internet and directly access the Console platform and its evolving ecosystem of leading cloud and SaaS providers."

As the company's market share continues to increase, Netelligent's reputation is strengthened as it services both Canadian and global businesses. In light of Montreal's Smart and Digital City strategy, Netelligent is positioning itself to be a major player in

Canada and the Eastern United States by increasing the capacity and reliability of communication infrastructure available to support large-scale deployments.

“We are excited to welcome Netelligent as one of the first Datacenter Partners that will offer direct access to the Console platform in Canada,” says Al Burgio, CEO of Console Inc. “By subscribing to our revolutionary Console platform, Netelligent customers will be able to directly connect to business-critical cloud and SaaS providers, enhance network security and improve performance.”
