# One Source Networks Joins Console NSP Partner Program

*Relationship Enables OSN to Provide Customers with Direct Access to a Broad Ecosystem of Cloud and SaaS Providers*

**Austin, TX – September 9, 2015** – One Source Networks (OSN), the UCC, managed network, and technology life cycle services partner of choice to large global enterprises announced today that it has joined the Console NSP Partner Program, which includes access to Console, the enterprise software and interconnection platform that is changing the way businesses directly connect to their customers, vendors, and partners.

The Console NSP Partner Program enables network service providers (NSPs) to offer customers direct access to Console for network-to-network and enterprise-to-enterprise collaboration globally. Upon establishing a network-to-network interface (NNI) with a Console node in one or more multiple global regions, the NSP Partner is able to offer enterprise customers direct access to Console with secure speeds ranging from 10Mbps to 100Gbps that bypass the public Internet.

The Console software and interconnection platform provides a secure, simple, and faster way for companies across the globe to directly connect to business-critical cloud providers, SaaS providers, and partners. Console's network automation technology provides customers direct access to a global ecosystem without the configuration complexity.

Through this collaboration, Console's customers will also be able to benefit from OSN's comprehensive portfolio of data services in over 200 countries and territories around the world.

"We are very excited for this opportunity to partner with Console," comments Gina Nomellini, chief marketing officer, One Source Networks. "This program and platform will enable us to bring further value to our customer base by providing them with direct access to the key SaaS and cloud suppliers and partners with whom they do business."

OSN delivers managed communications solutions to large, global enterprises. The company owns and operates a global SIP-based voice network which spans five continents, incorporating Sonus SBC Session Border Controllers to support bandwidth-heavy services such as Unified Communications. OSN also offers customers one of the largest telephony footprints of any single service provider.

"We are thrilled that One Source Networks is now part of the Console Partner Program," says Al Burgio, CEO, Console. "This platform delivers a true business ecosystem, connecting partners like One Source Networks to additional capabilities, and customers to a growing portfolio of innovative services and providers."

**About One Source Networks**
One Source Networks (OSN) is a leading managed communications partner to the world's largest enterprises. From Unified Communications and Collaboration (UCC) to managed network services and technology life cycle management, OSN delivers integrated solutions that revolutionize enterprise communications. Leveraging its expansive global network, unique service model and industry-leading applications, OSN takes the complexity out of communications, providing customers with unparalleled visibility and control of their technology ecosystems. One Source Networks is a five-time winner of the Inc. 500 | 5000 award, which highlights America's fastest-growing private companies.

**About Console Inc.**
Console Inc., an IIX company, was founded to change the way enterprises connect to their customers, vendors, and partners. Console's enterprise software and interconnection platform enables both network-to-network and enterprise-to-enterprise collaboration globally. The Console platform provides enhanced network security, improved performance, and faster business-to-business direct connect. For more information about the Console Early Access Program, visit http://www.console.to.

IIX Inc. is headquartered in Silicon Valley, California.  In March 2015, IIX acquired IX Reach Limited, further expanding its global interconnection footprint into more than 150 Points of Presence (PoPs) across North America, Europe, Asia, and the Middle East. IIX is privately held and backed by New Enterprise Associates (NEA) and DOT Capital.

*IIX is a registered trademark of IIX Inc.  All other trademarks are the property of their respective owners.*
