

Telinta Augments its TeliSIM MVNO Solution with Direct Calling for Additional Global Locations

- **Innovative MVNO solution enables VoIP service providers to offer highly profitable roaming with Direct Calling in the US, European Union and other global locations.**
- **Award-winning cloud-based MVNO solution replaces GSM Termination with cost-effective VoIP.**

Springfield, NJ (May 15, 2017) Telinta, a leading provider of cloud-based Switching and Billing solutions for VoIP service providers, today announced the addition of 10 new countries to its list of locations where *Direct Calling* is available for the company's award-winning TeliSIM MVNO solution.

This addition makes *Direct Calling* available in areas served by 93 mobile operators in over 60 countries across Europe, Africa, the Middle East, Asia, North and South America (including the United States), and other locations. TeliSIM can be used virtually anywhere a GSM signal is available, and includes low-cost roaming agreements with over 600 mobile operators around the world.

TeliSIM uses an entirely new methodology that brings GSM technology into Telinta's cloud-based TeliCore™ softswitch platform. This significantly cuts the cost for service providers to offer highly-profitable Global Roaming services for travelers at incredibly lower prices. Unlike over-the-top mobile VoIP, TeliSIM provides economical cellular voice calling via GSM, as well as SMS and mobile data.

"TeliSIM enables VoIP service providers to truly start their own highly-profitable MVNO business, using any VoIP termination and DID providers they need," explained Alex Ferdman, CEO of Telinta. "*Direct Calling* makes it faster and easier for end users to place calls, giving Telinta customers a competitive advantage."

For a live demonstration of Telinta's TeliCore softswitch platform, including TeliSIM, please visit Telinta at ITW Booth 1116 or online at www.telinta.com for more details.
