

GLOBALSM
TELECOM TESTING

Special ITW Announcement

Weston, FL (May 16, 2017): Global Telecom Testing (GTT) announces expanded Worldwide services that now include Worldwide Equipment Hosting and SMS Testing!!!

Putting your testing equipment in 200 countries expands your global footprint and increases customer base and revenues. Our local staff ensures that your equipment is secure, connected to wi-fi, electricity, all requested mobile networks, and are properly working and updated 24/7.

Pre and Post deployment in-country SMS testing across all mobile networks and handsets in every country ensures connectivity and message/content delivery. Our local teams procure SIMs for each network requested. Once your SMS is received our local staff replies to all messages and provides screenshots to verify character and content integrity. We also support real-time SMS testing, which integrates our local staff and your company to test and make real-time corrections!!!

About Global Telecom Testing

Global Telecom Testing (GTT) was founded in 2007 specifically to address the lack of worldwide, in-country, live telephone number testing and IVR platform quality assurance testing for global companies. GTT is the World's only that in-country tests and simulates the user experience with over 800 local testers in 200 countries for testing of phone numbers, SMS, mobile apps & games, global roaming, hosting and IVR platforms. We enable our clients to establish a local presence and highly reliable testing environment by leveraging the world's largest privately owned global footprint.

Customers gain a universal understanding of their in-country user experience, so they can make actionable corrective decisions with measurable ROI and collaborate on those decisions both internally and with telecom carriers. Each year GTT's phone number testing services and toll free number testing service tests over 50,000 numbers performing 100,000+ test calls. GTT's User Acceptability Testing (UAT) tests over 600 worldwide IVR platforms and tests 400+ mobile apps & games annually.
